Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires: Continuous pagination.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x		14x		18x		22x		26x		30x	
12x		16x		20x		24x		28x		32x	

The copy filmed here has been reproduced thanks to the generosity of:

École polytechnique,
Université de Montréal,
Bibliothèque

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

École polytechnique,
Université de Montréal,
Bibliothèque

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

ORBIT OF THE SPECTROSCOPIC BINARY BOSS 5996

BY ELYNOLD K. YOUNG, Ph.D.

Boss 5996 ($\alpha = 23^{\text{h}} 13^{\text{m}} 7^{\text{s}}$, $\delta = +11^{\circ} 43'$, mag. 5.90, type A) was announced as a binary by Adams in the *Publications of the Astronomical Society of the Pacific*, June, 1916. The following orbit has been computed from measures of forty spectrograms secured by the writer with a one-prism spectrograph attached to the 15-inch telescope.

Numerous metallic lines are present in the spectrum of this star, but on the plates taken here they are rather wide and diffuse, so that accurate measures of individual lines are impossible. The number of lines which can be utilized makes up for this lack to a certain extent. Table I gives the wave-lengths of all the lines measured, together with the mean residuals formed by taking the velocity as given by the plate from the velocities given by the lines. The total weight of each line is also given. The algebraic residuals can be used to correct the wave-lengths in the first column, and the arithmetic residuals give a general idea of the accidental error of setting on the lines and, indeed, if desired may be used to compute the probable error of measurement of the average plate.

The journal of observations follows in Tables II and III. The large range of the observed velocities defines the velocity curve pretty well, and the elements can be determined without any special difficulty.

TABLE I

				$\Sigma pv^2 =$	71.0	56.9

The observations were grouped into eighteen normal places, as given above, and from these preliminary elements were obtained by trial. In correcting the preliminary elements, Schlesinger's notation and form for the differential coefficients were adopted and found very satisfactory. The steps in the solution follow.

PRELIMINARY ELEMENTS

$$\begin{aligned}
 P &= 3.2195 \text{ days} \\
 T &= \text{J.D. } 2,421,059.945 \\
 e &= 0.05 \\
 \omega &= 45^\circ \\
 K &= 73.6 \text{ km.} \\
 \gamma &= -5.10 \text{ km.} \\
 \mu &= 111^\circ.819
 \end{aligned}$$

NORMAL EQUATIONS

$$\begin{aligned}
 17.8\Gamma - 0.278\kappa - 0.382\pi + 4.249\epsilon + 0.239\tau &= 1.201 \\
 9.899\kappa + 1.232\pi - 0.150\epsilon + 1.148\tau &= 0.369 \\
 + 7.901\pi - 0.451\epsilon + 7.133\tau &= 6.828 \\
 + 2.691\epsilon - 0.261\tau &= 3.579 \\
 + 6.479\tau &= 6.134
 \end{aligned}$$

$$\begin{aligned}
 \tau &= -5.210 & dT &= -0.033 \text{ day} & \pm .064 \\
 \epsilon &= +2.207 & d\omega &= -4^\circ.43 & \pm 7^\circ.13 \\
 \pi &= +5.688 & de &= -0.0135 & \pm .0067 \\
 \kappa &= -0.04 & dK &= -0.04 \text{ km.} & \pm 0.45 \text{ km.} \\
 \Gamma &= -0.27 & d\gamma &= +0.23 \text{ km.} &
 \end{aligned}$$

FINAL ELEMENTS

$$\begin{aligned}
 P &= 3.2195 \text{ days} \\
 T &= \text{J.D. } 2,421,059.912 & \pm .064 \text{ day} \\
 \omega &= 40^\circ.57 & \pm 7^\circ.13 \\
 e &= .0365 & \pm .0067 \\
 K &= 73.56 \text{ km.} & \pm 0.45 \text{ km.} \\
 \gamma &= -4.87 \text{ km.} \\
 a \sin i &= 3,240,000 \text{ km.} \\
 \frac{m_1^3 \sin^3 i}{(m + m_1)^2} &= .133 \odot
 \end{aligned}$$

The probable error of a single plate, computed from the residuals which result from the above elements, is 2.5 kilometres.
